Data sheet

PHOENIX PLAST

Reference : 10435-71

Product photos

Description

Artificial PHOENIX PLAST, featuring PE fronds, with a spread of 170 cm and a clearance height under the foliage of 92 cm. The trunk, with a diameter of 8 cm, is made of resin and coconut fiber. The base consists of a PVC pot measuring 19 cm in diameter and 18 cm in height.Suitable for outdoor use, provided the following recommendations are followed:- Install the product in a sheltered area, protected from wind.- Protect the coconut fiber section with an appropriate waterproof treatment.- Ensure watertightness by sealing the junction between the head and the trunk with silicone to prevent water infiltration.- Drill holes in the original pot to allow water drainage, then place and secure it in a decorative container with a drainage system to prevent water from accumulating at the base of the plant.
