

Data sheet

PHOENIX PLAST Reference : 10435-71

Product photos

Description

Artificial PHOENIX, with PE palms, a spread of 170 cm and a height under foliage of 92 cm. The 8 cm diameter trunk is made of resin and coco. The base is a PVC pot 19 cm in diameter and 18 cm high. Suitable for outdoor use, but the coco part needs to be treated with a water-repellent product. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant.
