Description

EUCALYPTUS M TREE 160 cm, Artificial, made up of 6 PE heads and a natural multi-trunk, 50 cm high under foliage and a spread of 70 cm, at the base is a PVC pot with a diameter of 16 cm and a height of 14.5 cm. Suitable for outdoor use, but the wooden trunk must be treated with a water-repellent product. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish.
