## BOXWOOD BALL RED DAY UV

Reference : 11535-UV71

### Product photos

## Description

Artificial BOXWOOD BALL RED DAY UV, diameter 62 cm, wooden trunk, height of trunk between bottom of ball and before pot: 21 cm, height between bottom of ball and pot (ground): 35 cm. The wood used for the trunk is Theaceae. The base is a PVC pot with a diameter of 16 cm and a height of 14.5 cm. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. Suitable for outdoor use. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
