Description

Artificial EUCALYPTUS TREE UV, made up of 5 natural wooden trunks, a height of 110 cm under foliage, at the base is a PVC pot with a diameter of 20 cm and a height of 18 cm. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. Suitable for outdoor use. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
