Description

Artificial CHOISYA TREE PLAST 150 UV, composed of natural wooden multi-trunks, the height under foliage is 45 cm. The base is a PVC pot with a diameter of 16.5 cm and a height of 15 cm. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. Suitable for outdoor use. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
