Description

Artificial BAY LAUREL NEW BALL 50 UV, with a base pot measuring 11 cm in diameter and 10 cm high. The first branches are 19 cm from the bottom of the pot. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. Suitable for outdoor use. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
