Description

Artificial TAMARIND (mimosa), made up of 5 natural wooden trunks. The first leaves are 82 cm from the bottom of the pot. The base is a PVC pot with a diameter of 16.5 cm and a height of 15 cm. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Suitable for outdoor use. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
