Product photos

Description

Artificial DICKSONIA, consisting of a moss-covered wooden trunk, 6 branches of UV-resistant PE foliage and young shoots, with a height under foliage of 35 cm. The base is a PVC pot 16.5 cm in diameter and 14.5 cm high. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. Suitable for outdoor use. UV resistance guarantee: 2000 hours (hours of sunlight), i.e. approximately 2 years.
