Description

BOXWOOD BALL NEW DIAM 50 FR - Fire Resistant Artificial, made up of 1548 leaves, with a height under foliage (trunk + pot) of 20 cm, the species used for the trunk is Theaceae. The base is a PVC pot 11 cm in diameter and 9 cm high. Suitable for outdoor use, but the wooden trunk must be treated with a water-repellent product. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish. This reference is fire resistant / flame retardant and complies with the European standard EN 13501-1:2018, as confirmed by an SGS test report, whose reference and classification are listed in the specifications above.
