Description

Artificial BOXWOOD STEM DOUBLE BALL, the top ball has a diameter of 35 cm and the bottom ball has a diameter of 40 cm. The wood used for the trunk is Theaceae. The base is a pot with a diameter of 16.5 cm and a height of 15 cm. Suitable for outdoor use, but the wooden trunk must be treated with a water-repellent product. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish.
