Description

Artificial BOXWOOD STEM DOUBLE BALL, the top ball has a diameter of 55 cm and the bottom ball has a diameter of 70 cm. The wood used for the trunk is Theaceae. The base is a PVC pot 17 cm in diameter and 15 cm high. Suitable for outdoor use, but the wooden trunk must be treated with a water-repellent product. The original pot must be pierced to allow water to drain out. It should be attached to the decorative planter, creating drainage to prevent water stagnating at the foot of the plant. Wood is a living material. Outdoors, it is perfectly normal for wood to peel. Simply maintain it with light brushing, then reapply a water-repellent varnish.
